

HARMFUL - KEEP OUT OF REACH OF CHILDREN

**ADJUVANT**  
**Agricultural / Horticultural Wetting and Spreading Agent**

**ACTIVE INGREDIENT**

Alcohol Ethoxylate.....81.5 g/L

Read label before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required.

**WARNING** – Flammable liquid and vapour. Causes skin irritation. Harmful if inhaled.

Suspected of damaging fertility or the unborn child.

NOT REGULATED AS A DG FOR TRANSPORT refer to section 14 of the safety data sheet for more information.

**PRECAUTIONS**

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

**STORAGE:** Keep out of reach of children. Store in original, tightly closed container, in a secure place.

**PERSONAL PROTECTION:** Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking. Keep container tightly closed. Ground and bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use non-sparking tools. Take action against static discharge. Avoid breathing mist/vapours/spray. Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing/eye protection/face protection.

**PRODUCT DISPOSAL:** In the event of spillage or leakage, soak up the material with absorbent clay, sand, sawdust or other absorbent materials. Wastes resulting from the use of this product may be disposed of at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Pack size up to 60L: Triple rinse empty container and add rinsings to spray tank. Discard the container at your nearest Agrecovery collection point or crush and bury container in a suitable landfill.

Pack size over 60L: Triple rinse empty container and add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility.

FIRST AID

**IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

**IF ON SKIN (or hair):** Remove/Take off immediately all contaminated clothing and wash before re-use. Rinse skin with water/shower. If skin irritation occurs: Get medical advice/ attention.

**IF INHALED:** Remove to fresh air and keep at rest in a position comfortable for breathing.

**IF SWALLOWED:** Rinse mouth. Do not induce vomiting.

If poisoning occurs, contact a Doctor or the National Poisons Centre 0800 POISON (0800 764 766). Have the product container or label with you when calling a doctor or poisons centre or going for treatment.

**EMERGENCY RESPONSE:** In case of fire: Use water fog, foam, dry chemical powder, carbon dioxide (CO2) for extinction. For hazardous materials or dangerous goods incident: Spill, Leak, Fire, Exposure or Accident Call CHEMTREC Day or Night: New Zealand: +(64)-98010034 / Outside of New Zealand: +1(703)741-5970 (CCN 4897)

GENERAL INFORMATION

WETCIT is designed for use in tank mixtures with most agrochemicals registered for use in agriculture, horticulture and turf production. Regular use of WETCIT in a spray program will prevent build-up of chemical residues in spray tanks, resulting in less clogging of nozzles. The efficacy of WETCIT will not be affected by the pH of the spray mixture. WETCIT will not influence the pH of the spray mixture.

DIRECTIONS FOR USE

Mode of application: Foliar application.

**CROPS** – All Crops

**PARTNERS** – All approved agrochemicals – Foliar nutrients

**MAXIMUM NUMBER OF TREATMENTS** – Follow the statutory conditions of use of the agrochemical partner.

**LATEST TIME OF APPLICATION** – Follow the statutory conditions of use of the agrochemical partner.

**SPRAYING EQUIPMENT** – Suitable for use in various application techniques: Full cover tractor application, low volume concentrated, spray, pivot, aerial application, back-pack, etc.

MIXING

When WETCIT is to be mixed with another substance, the normal mixing procedure prescribed for the partner should be followed. WETCIT must be added last to the spray tank after it has been filled to at least two-thirds of final volume. For best results, use within 24 hours of mixing. Anti-foam may be necessary if the tank mix has been aerated. This will not affect efficacy. Ensure that all spray equipment is thoroughly cleaned when using WETCIT for the first time as chemical residues present in such spray tanks and equipment may be loosened. Check filters more frequently during initial application.

APPLICATION DOSAGE RATES

CROP	
All Crops (*Ultra Low Volume Equipment)	
ALREADY APPROVED AGROCHEMICAL PARTNERS	WETCIT CONCENTRATION IN FINAL SPRAY SOLUTION (v/v)
Herbicide	100-800mL/100 L
Hard to kill weed	400-800mL/100 L
Insecticides, miticides, fungicides	100-300mL/100 L (*50-200mL/100 L)
Plant growth regulators	50-100mL/100 L
Foliar nutrients	100-300mL/100 L (*50-200mL/100 L)

**IMPORTANT GUIDELINES:** Do not use WETCIT on pears, persimmons, pomegranates or table grapes between flowering and harvest as fruit marking may occur. **COMPATIBILITY:** WETCIT is compatible with most agro-chemicals. However, compatibility may be influenced by other products in the tank mixture, therefore a preliminary small scale test should be done with the final mixture before spraying on the intended crops.

PHYTOTOXICITY

Application should be done in the morning or in the evening (avoid high temperatures). DO NOT spray to the point of run-off, especially in fruiting stages of pome fruits, cherries or other sensitive crops. Due to variation in copper and sulphur formulations, a compatibility test is highly recommended. Use caution when combining in tank mixes with EC formulations, copper containing products and/or chlorpyrifos on crops normally sensitive to these compounds. When tank mixing a combination of several chemistries, it is advised to reduce the WETCIT rate to the low end of the spectrum.

NOTICE OF WARRANTY

CONDITIONS OF SALE-LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES:To be read prior to using this product. The directions should be followed carefully together with good application practice. Failure to do so may cause injury to crops, animals, man or the environment. Extraordinary or unusual weather conditions may affect product performance and/or crop injury which are beyond the control of Oro Agri, Inc. (the "Company") or seller. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the Directions For Use. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law. The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Company's election, ONE of the following: 1. Refund of the purchase price paid by buyer or user for product bought. 2. Replacement of the product used. To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company/seller offer this product and the buyer/user accepts it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.

Approved pursuant to the HSNO Act 1996, approval code HSR002495.

See [www.epa.govt.nz](http://www.epa.govt.nz) for controls applying to the substance.
