

SEED TREATMENT

Avipel

Bird repellent for the protection of Maize, Sweetcorn, Turf seed and Forage Ryegrass, Herb, Brassica and Cereal seed against consumption by birds

Contains 250 g/L anthraquinone in the form of a flowable concentrate for seed treatment

WARNING

Keep out of the reach of children

Net Contents 10 LITRES

READ LABEL COMPLETELY BEFORE USE GENERAL INFORMATION ANY PERSON PURCHASING, HANDLING OR DISPOSING OF THIS PRODUCT MUST BE SUITABLY QUALIFIED

WARNING

PRECAUTIONARY STATEMENTS PREVENTION

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash hands thoroughly after handling. Wear protective gloves, clothing, and eye protection. Do not breathe spray. Avoid release to the environment. Do not apply directly into or onto water. Take all reasonable steps to ensure that the substance does not cause any significant adverse effects to the environment beyond the application area

RESPONSE

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice. IF exposed or concerned: Get medical advice. Get medical advice if you feel unwell. Collect spillage

STORAGE

Store locked up.

SHELF LIFE

When stored appropriately, this product should show no significant degradation for two years from the date of manufacture. When using this product beyond this shelf life, contact the supplier for further information.

DISPOSAL

Dispose of contents / container in accordance with local regulations.

Container disposal Ensure the container is empty. Triple rinse empty container and add rinsate to the spray tank. Recycle empty container through Agrecovery® (0800 247 326, www.agrecovery.co.nz). Otherwise crush and bury in a suitable landfill. DO NOT reuse this container for any other purpose.

Product disposal Dispose of this product only by using according to the label, or at an approved landfill or other approved facility.

SAFETY DATA SHEET

Additional information is provided in the SDS available from your supplier, or www.agrisource.co.nz

FIRST AID

If medical advice is needed, have the product container or label at hand.

EMERGENCY RESPONSE

In a transport emergency call 111, Police or Fire Brigade

The active ingredient in **Avipel** (Anthraquinone) is made from a naturally occurring organic substance, and when applied correctly, forms a bird repellent coating on seed. When birds eat seeds coated with **Avinel**, they experience an unpleasant, but harmless out reaction which they associate with the location. Birds may sample treated seeds, but they will avoid additional consumption

Use this product only in commercial seed treatment equipment. Treated seed must not be used for or mixed with food or animal feed or processed for other uses.

DIRECTIONS FOR USE APPLICATION

Avipel may be applied as a water-based slurry alone, or with other compatible seed treatment materials, or sequentially with other registered, crop protection products. Apply water-based slurry through a standard slurry, mist-type or batch commercial treater.

Prior to mixing, potential tank mix partners which include pesticides, colorants, dyes and polymers should be tested for physical compatibility with Avipel.

As seed treatment may alter the flow rate of the seed, the planter must be calibrated to ensure seed treated with Avipel is applied at the desired plant population.

RESTRICTIONS

This substance must only be applied as a seed treatment.

This substance must only be applied to seeds in a purpose-built seed coating machine, in a treatment facility.

MIXING

Prior to mixing or decanting ensure the container is well shaken or rolled to re-suspend the formulation. Application equipment must be clean and free of previously used pesticide. Uniform coating of the seed is necessary to insure proper efficacy. Depending on the type of seed treating equipment, a small amount of water can be added to the product to facilitate product flow through the spray nozzles. Do not exceed 40mL of water per litre Avipel. At the time of treatment the seed must be dyed a distinctive colour.

After treatment, seed must be dry before storage or rebagging.

RATES

Maize and Sweetcorn seed	Apply 1 litre of Avipel per 100kg of seed
Turf Seed	
Forage Brassica seed	
Forage Grass seed	Apply 1.2 litres of Avipel per 100kg of seed
Forage Herb seed	
Cereal seed	

Recommended label statements for seed treated with Avipel

This seed has been treated with Avipel (Anthraguinone) bird repellent and must not be used for human or animal consumption. Wear gloves and a dust mask when handling treated seed. Wash exposed skin before eating or drinking.

Treated Seed must not be used for food or feed. Left over treated seed should not be stored but should be double sown around the headland.

Do not apply directly into or onto water.

Take all reasonable steps to ensure that the substance does not cause any significant adverse effects to the environment beyond the application area.

WITHHOLDING PERIODS

Not applicable - Non-systemic, no residues in emerging shoots/plant.

CONDITIONS OF SUPPLY

All goods supplied by us are produced under rigid quality control procedures which assure the purchaser that at the time of sale they are physically suitable for use in the manner stated. However, to the extent permitted by law, buyers and/or users of the goods accept that neither the manufacturer, Agrisource as the distributor have any liability or responsibility whatsoever for any loss, damage or injury whether in contract or tort, whether direct, indirect or consequential howsoever rising in connection with the supply of these goods.
